(54) Title: DIGITAL DISPLAY

(57) Abstract: A mobile telephone (1) comprises an LCD (liquid crystal display) screen (2) for visually displaying data items (2a), status and other relevant information to a user. The mobile telephone (1) includes a keypad (3) to enable a user to input information such as numbers or letters, and some functions of the telephone may also be accessed and/or selected by means of the keypad (3). The mobile telephone (1) further comprises a rotary scroller input means (4) located on the side of the telephone for convenient operation thereof by a user. The input means (4) is mounted in the housing of the telephone (1) such that only a portion (7) thereof is visible and accessible to the user externally of the telephone housing. The rest of the input means (4) is mounted within, and obscured by, the housing of the telephone (1). In fact, the 'invisible' portion of the input means (4) is located directly behind the display screen (2), with the axis of rotation (6) of the input means (4) being substantially perpendicular to the plane of the screen (2). The "invisible" portion of the input means (4) is represented (both visually and operationally) on the screen (2).

EV SYSYYUIZU O

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
